

Use Case ID	UC-10
Use Case Name	Add Block from Manager
Actor	Manager App
Description	If a patient doesn't come, it should be punched him to waste the doctor's time and book an appointment that he doesn't want it. Thus, the manager app blocked .him if he breaks the conditions
Pre-Condition	Who blocks has to be manager.
Basic Path (Flow of event)	1- When doctor tell the secretary who for center about a patient didn't come, the secretary calculates the number of times he didn't come. 2- Then the secretary sends a report to the manager app. 3- The manager app decides whether to block him or not
Alternative Paths	1-If the secretary finds the number of times less than the average, she won't send a report. 2-the secretary tells the manger that the patient made problems.
Post-Condition	If a patient is blocked, he will not be able to book an appointment for a while when the manager had deducted it before.

Exception Pathway(s)	Sending report failed.
